OPEN VIRTUAL DESKTOP
ENTERPRISE OPEN VIRTUAL DESKTOP AND APPLICATION DELIVERY SOLUTIONS

Ulteo offers a unique offering that was missing in the application delivery and virtual desktop market. Therefore Ulteo is also working in developing specific scenario supporting leading partners solution:

▸ Ulteo OVD is a great addition to pure RDS/TS Windows® project with Server Management features, but also if you need linux apps Support. **Ulteo is the perfect Windows®-Linux apps Interoperability solution.**

▸ You have VMWare View but you **just need to deliver Windows® or Linux applications or add Linux application support** in View. Ulteo can do the job.

▸ Already a Citrix® customer and you need linux support or need a simpler solution for standard users: **Ulteo is the ideal addition to your XenApp or XenDesktop Installation.** OVD v3 runs on Xenserver.
